

2810. Ködderitzsch (Rolf): Indo-iranisch-keltische Übereinstimmungen.

*In* ZCP 49–50 (1997), pp. 382–395.

Discusses seven morphological and syntactical features already touched upon by W. MEID (cf. *BILL* 470, pp. 45-56). With regard to Old Irish, these are: 1. the *gaisced* type of neuter singular dvandva; 2. the morphology of *rígain*; 3. the ending \*-s of the genitive singular of the neuter *n*-stems; 4. the feminine forms of the numerals '3' and '4'; 5. the reduplicated *s*-future; 6. the perfect formation *-ánaicc*; 7. the elliptic construction *conráncatar ocus Dubthach*.
