

2822. Ní Mhaonaigh (Máire): Some Middle Irish declensional patterns in *Cogad Gáedel re Gallaib*.

*In* ZCP 49–50 (1997), pp. 615–628.

Discusses examples of Middle Irish innovations in the nominal system, namely the loss of the neuter, the ousting of the dual, the simplification of the case system, and the remodeling of the declensional stems.

*Classifications:*

- E 5.1.2: Morphology: Noun, adjective
- L 3.3: History: Historical literature: Historical Romance
- C 2.1: Historical linguistics, language change and comparative philology
