

3406. Charles-Edwards (T. M.): The construction of the *Hibernensis*.
In *Peritia* 12 (1998), pp. 209–237.

Studies the textual relationship of *De contrariis causis* (book 67 in recension A of *Collectio canonum Hibernensis*) and corresponding material in other books (21–29), and suggests that the A recension is unfinished and was released after the death of compiler Ruben of Darinis (†725), while the B recension is based on a corrected and expanded copy, possibly the work of his collaborator Cú Chuimne of Iona (†747).
