

703. McCone (Kim): The dative singular of Old Irish consonant stems.

In Ériu 29 (1978), pp. 26–38.

Derives ‘short’ dative forms from an early apocope of locative *-i, thus arguing against the ‘IE endingless locative’ hypothesis suggested by R. THURNEYSEN (*GOI* §315). Also discusses relevance of *inn-uraid* ‘last year’.
